

## LIST OF FIGURES

Figure 2.1	Schematic figures of the simple geometries in which heat transfer in one dimensional . . . . .	4
Figure 2.2	Transient temperature profiles in a plane wall exposed to convection from its surfaces for $T_i > T_\infty$ . . . . .	5
Figure 3.1	Midplane dimensionless temperature for plane wall . . . . .	34
Figure 3.2	Dimensionless temperature distribution for plane wall . . . . .	34
Figure 3.3	Centreline dimensionless temperature for long cylinder . . . . .	35
Figure 3.4	Dimensionless temperature distribution for long cylinder . . . . .	36
Figure 3.5	Midpoint dimensionless temperature for solid sphere . . . . .	37
Figure 3.6	Dimensionless temperature distribution for solid sphere . . . . .	37
Figure 4.1	Difference between exact solution and one term approximation solution for plane wall for $Bi = 10$ and $\tau = 0.1$ . . . . .	39
Figure 4.2	Difference between exact solution and one term approximation solution for cylinder for $Bi = 10$ and $\tau = 0.1$ . . . . .	39
Figure 4.3	Difference between exact solution and one term approximation solution for sphere for $Bi = 10$ and $\tau = 0.1$ . . . . .	40
Figure 4.4	Variation of errors for plane wall for $Bi = 1$ . . . . .	41
Figure 4.5	Variation of errors for plane wall for $Bi = 10$ . . . . .	42
Figure 4.6	Variation of errors for plane wall for $Bi = 100$ . . . . .	42
Figure 4.7	Variation of errors for long cylinder for $Bi = 1$ . . . . .	43
Figure 4.8	Variation of errors for long cylinder for $Bi = 10$ . . . . .	44
Figure 4.9	Variation of errors for long cylinder for $Bi = 100$ . . . . .	44
Figure 4.10	Variation of errors for solid sphere for $Bi = 1$ . . . . .	45

Figure 4.11	Variation of errors for solid sphere for $Bi=10$ . . . . .	46
Figure 4.12	Variation of errors for solid sphere for $Bi=100$ . . . . .	46
Figure 4.13	Variation of correction factor for plane wall for $Bi= 1$ . . . . .	55
Figure 4.14	Variation of correction factor for plane wall for $Bi= 10$ . . . . .	55
Figure 4.15	Variation of correction factor for plane wall for $Bi= 100$ . . . . .	56
Figure 4.16	Variation of correction factor for long cylinder $Bi= 1$ . . . . .	56
Figure 4.17	Variation of correction factor for long cylinder $Bi= 10$ . . . . .	57
Figure 4.18	Variation of correction factor for long cylinder $Bi= 100$ . . . . .	57
Figure 4.19	Variation of correction factor for solid sphere $Bi= 1$ . . . . .	58
Figure 4.20	Variation of correction factor for solid sphere $Bi= 10$ . . . . .	58
Figure 4.21	Variation of correction factor for solid sphere $Bi= 100$ . . . . .	59
Figure 4.22	Difference between exact solution and approach solutions for plane wall for $Bi= 10$ and $\tau= 0.05$ . . . . .	63
Figure 4.23	Difference between exact solution and approach solution for long cylinder for $Bi= 10$ and $\tau = 0.05$ . . . . .	63
Figure 4.24	Difference between exact solution and approach solution for solid sphere for $Bi=10$ and $\tau = 0.05$ . . . . .	64
Figure 4.25	Variation of errors for plane wall for $Bi=1$ . . . . .	65
Figure 4.26	Variation of errors for plane wall for $Bi=10$ . . . . .	66
Figure 4.27	Variation of errors for long cylinder for $Bi=1$ . . . . .	66
Figure 4.28	Variation of errors for long cylinder for $Bi=10$ . . . . .	67
Figure 4.29	Variation of errors for solid sphere for $Bi=1$ . . . . .	67
Figure 4.30	Variation of errors for solid sphere for $Bi=10$ . . . . .	68
