## I. ACKNOWLEDGEMENTS

We would like to thanks Dr. Yalçın Akçalı and Miss Nadire Çavuş who are our teachers, and they are helped us during making this project and whenever we knock their door they never refuse our questions during the preparing our graduation project.

We also would like to thanks the people who create internet source of <http://www.macromedia.com>, <http://www.apache.com>, <http://www.mysql.com> This site's was very helpfull for us for prepareing our project .

## II. ABSTRACT

This project is about any School or Government Offices Telephone Dictionary Catalogue. All Secretary in the school will easily to record all their department trachers and Department secretary phone informations to the Database.

At the same time we take copy of K.K.T.C. phone catalogue and add them in our databases.

This program will help the all school person's to easily find the telephone numbers which they needed in the school or K.K.T.C phone catalogue. This program helps the telephone operators to find easily their wanted numbers. At the same time telephone operator's telephone traffic get lower level, because all people can easily find their wanted number from their computer's. Don't need any operator's help.

### III. INTRODUCTION

This program written to Near East University or Any Big Government Office as a Telephone Dictionary Package. Secretary easily recording telephone numbers to our database, and at the same time we take a copy from K.K.T.C Telephone dictionary information's and add them in our database. This allows All users in our school or internet can easily use this program and to find their needed telephone numbers sub to peoples or organizations names or phone numbers.

This program has been programmed with Macromedia Flash Mx 6. The database of this program is MySQL 4.1.12. The web server used Apache 2 platform. And The Application server is PHP 4.1.12. If user wants to execute this program in Macromedia Flash Mx 6 design view, the user must install FlashMx 6, MySQL 4.1.12 ver database, Apache 2 web server and P.H.P ver 4.1.12 application server into his / her computer. And make needed adjustments to run this program under the web.

To install Macromedia Flash Mx 6 into computer needs about 100 Mb harddisc space. You can setup this program to click setup.exe and press next buttons until finish the setup. All detailed setup informations inside the install.txt file.

To install MySQL 4.1.12 into computer needs about 30 Mb harddisc space. You can setup this program to click setup.exe and press next buttons until finish the setup. All detailed setup informations inside the install.txt file.

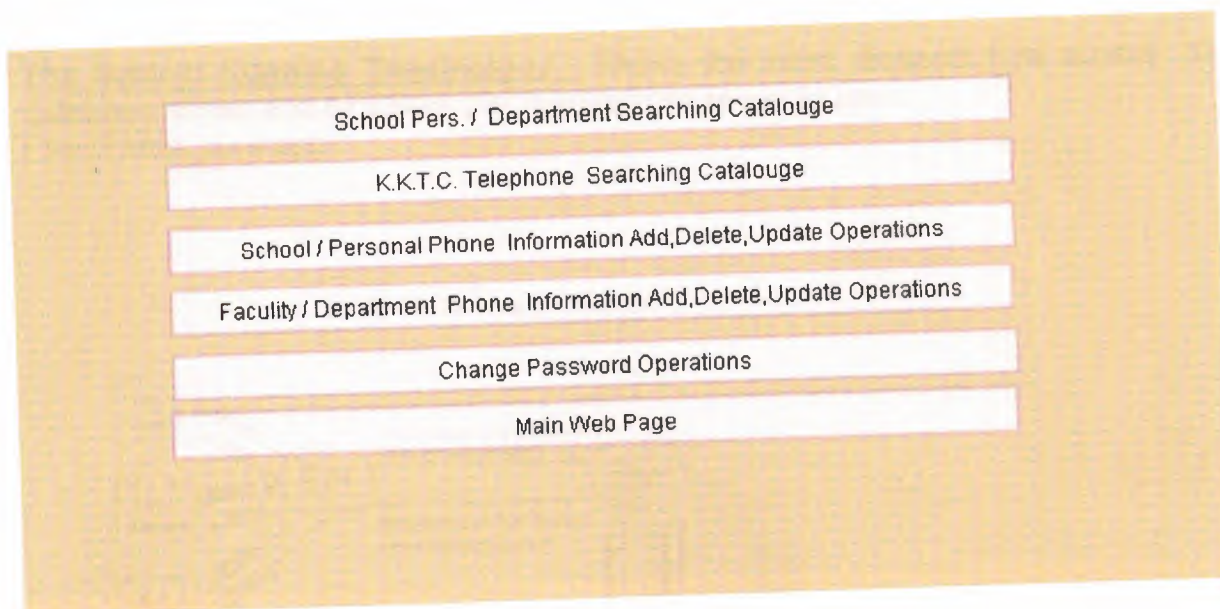

To install Apache 2 into computer needs about 5 Mb harddisc space. You can setup this program to click setup.exe and press next buttons until finish the setup. All detailed setup informations inside the install.txt file.

To install P.H.P.4.1.12 into computer needs about 10 mb harddisc space. You can setup this program to click setup.exe and press next buttons until finish the setup. All detailed setup informations inside the install.txt file.

When Finished needed programs setup to you'r computer. Make needed adjustments to your computer. Then you can easily connect your computer to the internet or any intranet. All users can run the required browser program and type in the address bar <http://193.255.239.227> and press enter. You will see the menu on your computer screen.

The Main menu of the program are the consists of several programs. These are;

**School Pers. / Department Searching Catalouge:** Have Detailed Searching proceses from School Telephone database.

**K.K.T.C Telephone Searching Catalouge:** Have Detailed Searching proceses from K.K.T.C. Telephone database.

**School / Personal Phone Information Add,Delete,Update Operations:** Add new,Update or Delete School Department/Persons Phone information to School database.

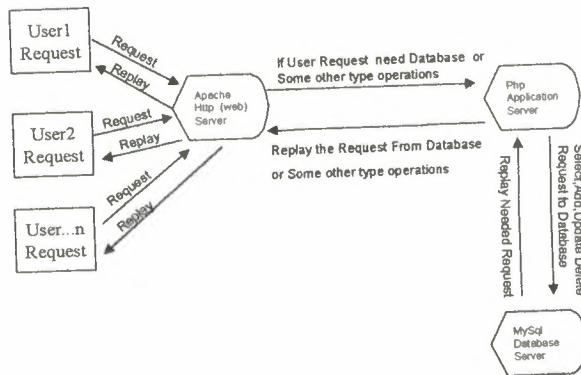

**Faculity / Department Code Information Add,Delete,Update Operations:** Add new,Update or Delete School Faculity/Department Code information to School database.

**Change Password Operations:** Add new or Delete password operations right has only superusers, Update password operations right has only powwer users to School database.

**Main Web Page :** Exit program and to turn back from the main web page.

**The System Running Terminology :** Shows the users requests how access the database server and turn back the results from server to user.  
( See System\_view.ppt)

The System Running Terminology

### **MINIMUM SYSTEM REQUIREMENTS TO EXECUTE PROGRAM For Clients**

Internet Explorer 5.0 version  
Netscape 4.01 version

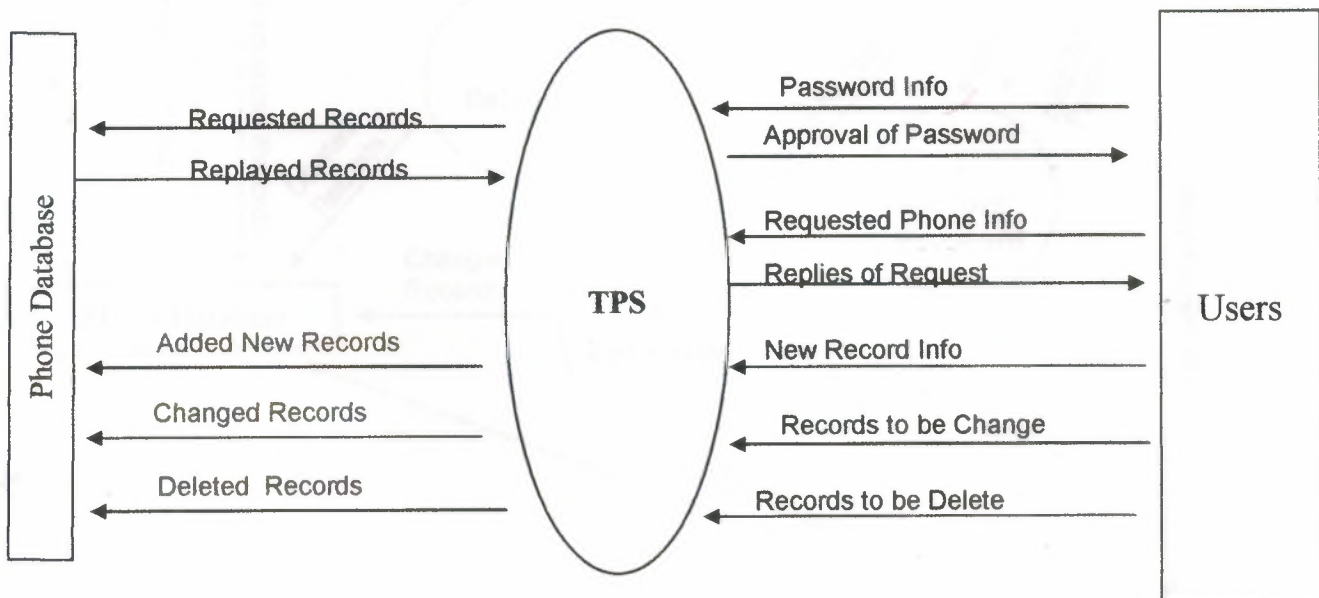

### **RECOMMENDED SYSTEM REQUIREMENTS TO EXECUTE PROGRAM For Clients :**

The Newest Version of Internet Explorer  
The Newest Version of Netscape

### **RECOMMENDED SYSTEM REQUIREMENTS TO SETUP PROGRAM**

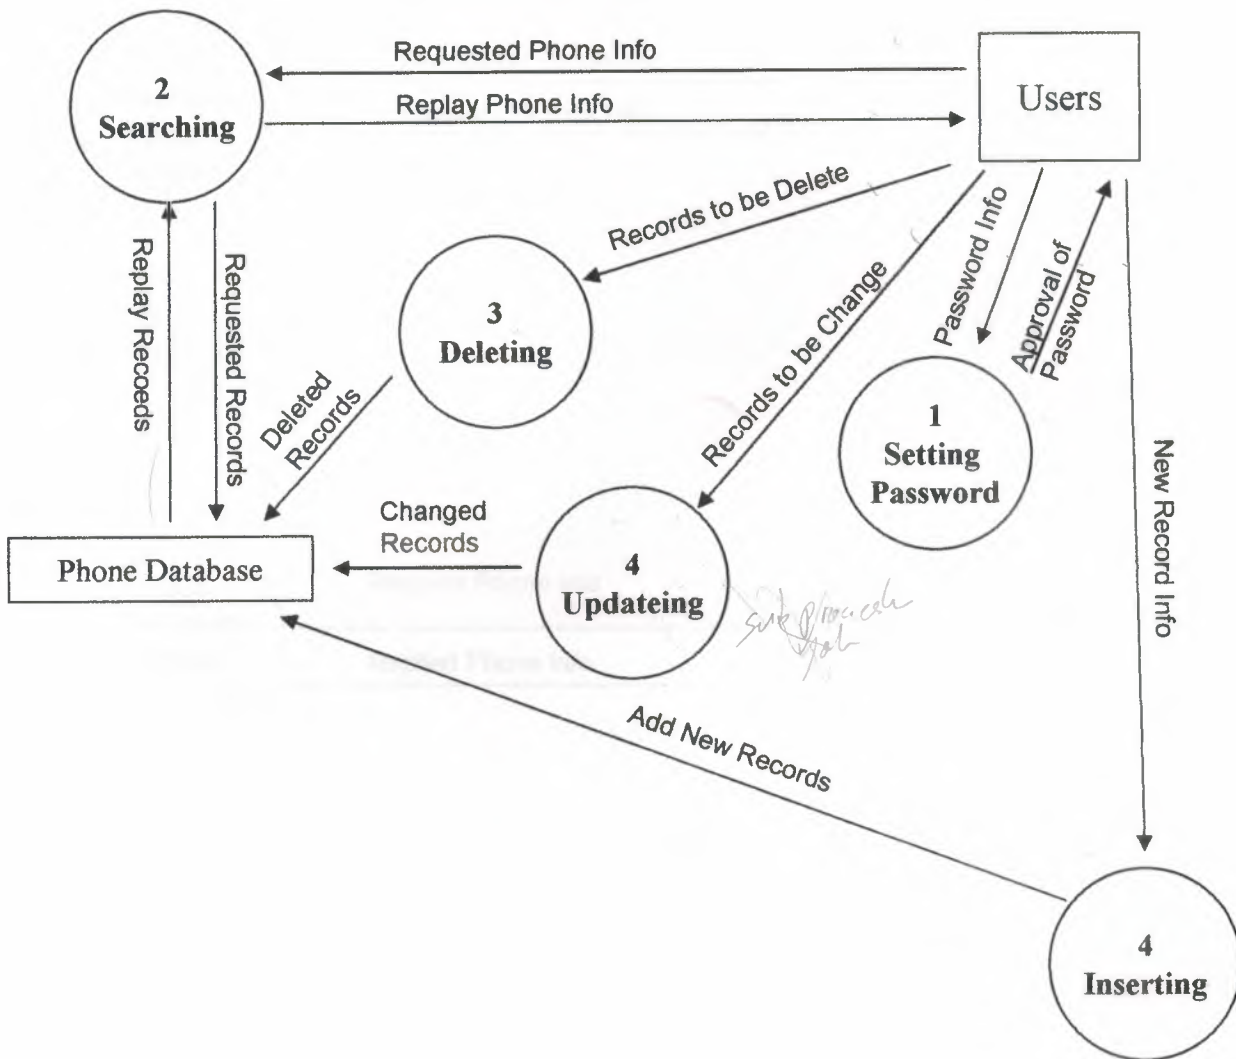

Windows 2000  
20 Gb harddisc  
4 Mb VGA  
550 Mhz Processor  
128 Mb Ram  
800 x 600 Screen Resolution  
44 x Cd Rom

dep_kyapan	TEXT	10	0

**TEL\_SIFRE DATABASE**

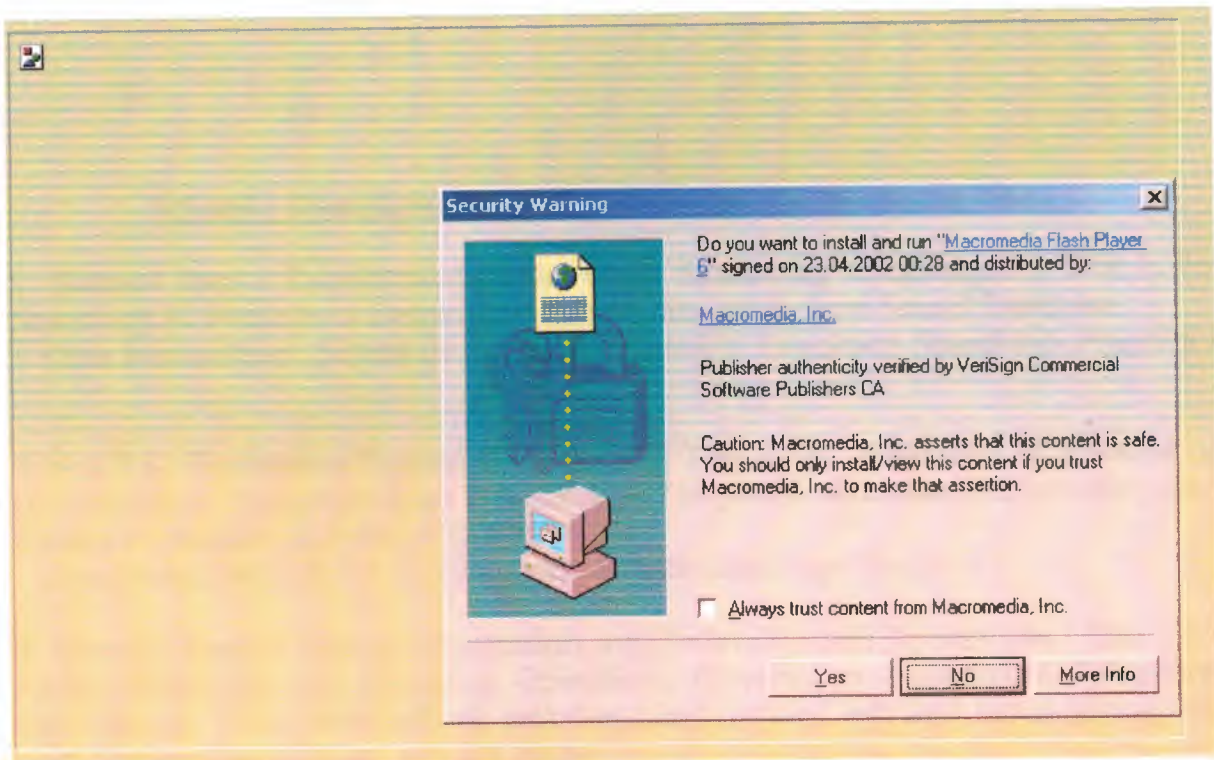

<b>FIELD NAME</b>	<b>TYPE</b>	<b>WIDTH</b>	<b>DEC</b>
sif_kkno	TEXT	10	0
sif_adi	TEXT	20	0
sif_soya	TEXT	20	0
sif_sifre	TEXT	10	0
sif_yetki	TEXT	1	0
sif_id	INTEGER	4	0

## V – USER MANUAL

### How To Install This Program:

- 1- Click Internet Explorer or Netscape Program. When The required browser program run type in the address bar <http://193.255.239.227> and press enter.
- 2- If your computer don't setup before *Macromedia Flash Player 6* or Have the older version, your computer automatically dedect this information and if don't found required program on your computer then , your browser automatically start to setup that program to your computer. Then you will see below **security warning mesaage**. You must click the yes button to install **Macromedia Flash Player 6** to yourcomputer.

- 3- After Macromedia Flash Player 6 setup complete only once to your computer. Then our Telephone Dictionary Program automatically setup to your computer. When setup operation completed you will see menu on your screen. During the Telephone Dictionary Program update or add new functions to that program then store new version the server. Then When All users click <http://193.255.239.227> address and press enter the new version of program automatically update with new version. Don't need any requirements from users.
- 4- After program setup automatically completed you will see Login on your computer's screen. Type required information to user and password fields. (See *login.bmp* for details)

If you click the Check Password button then user automatically checked if correct information entered you will see the Menu. Otherwise Get Try again Message. (See: *menu.bmp* List of the menu)

K.K.T.C. Telephone Searching Catalouge

School / Personal Phone Information Add,Delete,Update Operations

Faculity / Department Phone Information Add,Delete,Update Operations

Change Password Operations

Main Web Page

### **School / Department or KKTC Telephone Catalogues Menu :**

**1. School Pers / Department Telephone Searching Catalouge** : This is for Searching All Persons or Department telephones inside from School Database  
(See Menu1.bmp: School Or Departmet Detailed Telephone Searching Program )

**2. K.K.T.C. Telephone Search Catalouge** : This is for Searching All Persons or Organizations Telephone from The K.K.T.C. Telephone database.This including also Adress information all listed informations.  
(See Menu2.bmp: K.K.T.C. Telephone Search Catalouge Program )

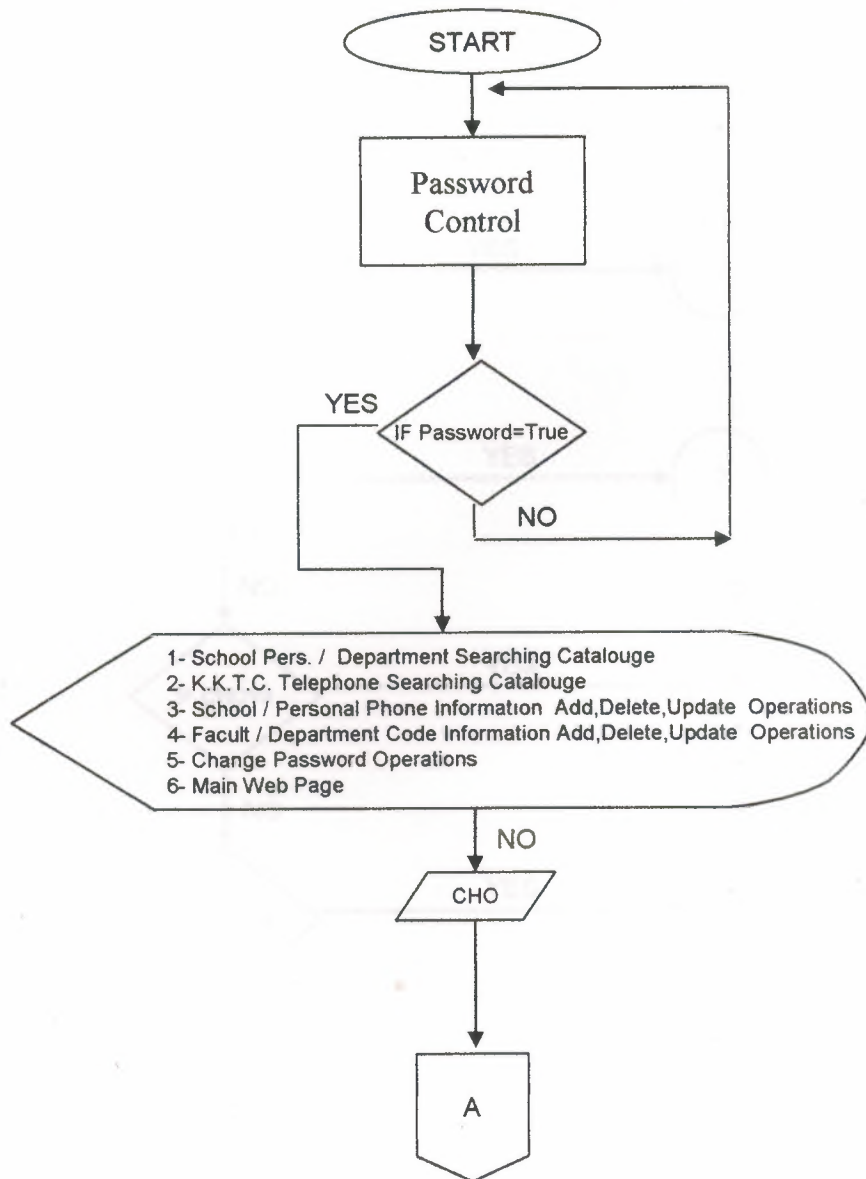

**3. School / Person Phone Information Add,Delete,Update Operations** : This is for Adding,Updateing and Deleteing Operations Personal or Department Telephone informations. These informations includes mobile phone info and home phone info also. Standard users don't see this menu.  
(See Menu3.bmp: School / Person Phone Information Add,Delete,Update Operations Program )

**4. Faculity / Department Code Information Add,Delete,Update Operations** : This is for Adding,Updateing and Deleteing Operations Faculity or Departments Code informations. Standard users don't see this menu.  
(See Menu4.bmp: Faculity / Department Code Add,Update,Delete Program)

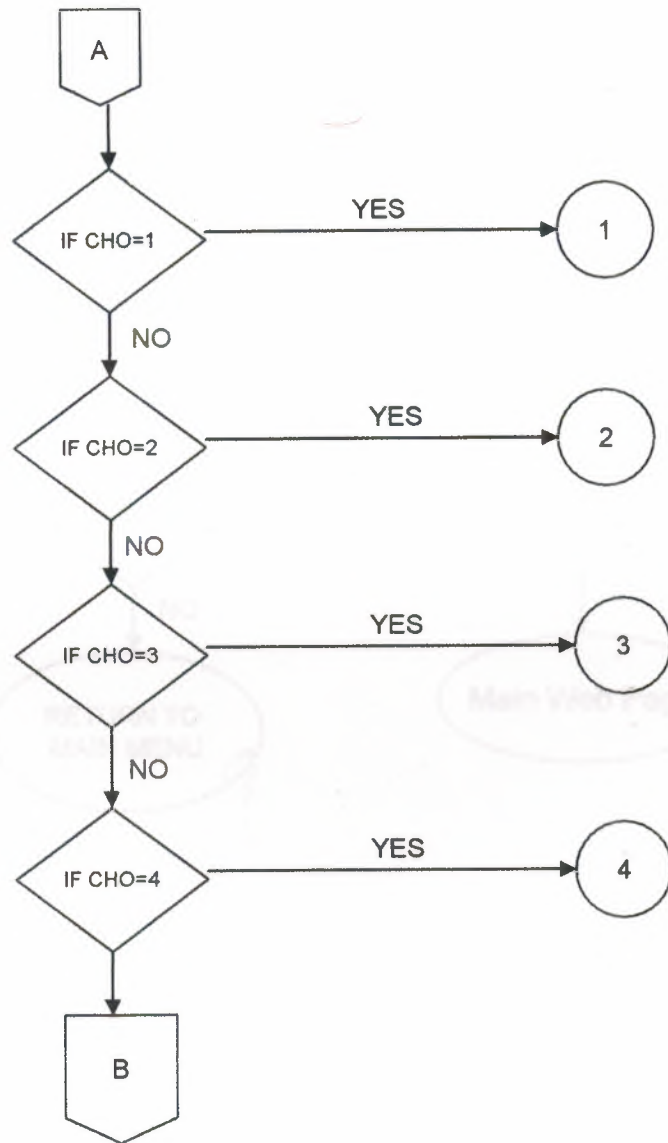

**5. Pasword Change Program** : This is for Adding and Deleteing Operations From Password The superuser righth users,But Password Change operations is only have the powwer users. Standard users don't see this menu.  
(See Menu5.bmp: Password Change Program)

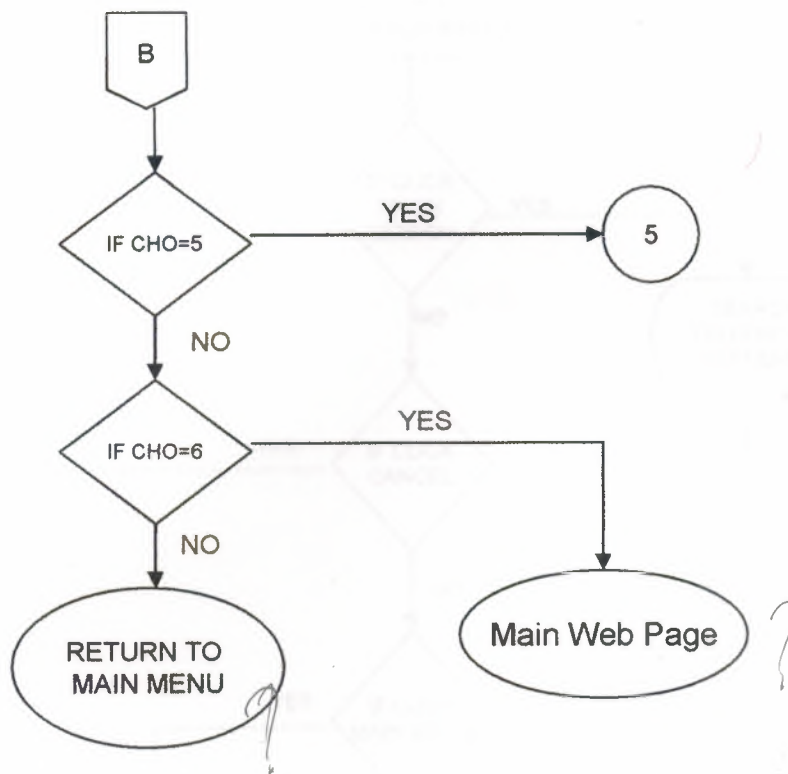

**6. Main Web Page:** Turn Back from main web page.
