ACKNOWLEDGEMENT

First I want to Say somethings about the 'Graduation Project Presentation' without pass to my project. First of all I have to say this I would like to celebre the Mr. Adnan KASHMAN who is head of the Computer Engineering department by reason of this 'Presentation' decide. And also all of the ather members of Academical stafs. Because that I know this is going to be very big experience For our future life. And I hope that, the level of our University's education will be come up somekind of this decides and evens...

And then I greatfully thanks to the Mr. Okan DONANGİL who is the adviser of my Graduation Project. I have to acknowledge this I coul not be stronger over the programming without him.

Because that every student know this he is so wonderfull teacher and also people. And he is successfull when he is giving lectures. He knows what is the meaning and responsibility of teacher and teaching. I hope that the number of teachers who are as you is will more....

THANKS TO YOU MR. OKAN DONANGİL FOR YOUR EVERYTHING,
THANKS.....

And I would like to thanks to the Mr. Tayseer ALSANABLEH for his helps during my University's education. I know this you are also good teacher at least as much as Mr. Okan DONANGİL:

When you are doing your job. I would like to see you on you pozition so many year more....

And also I would like to thanks all of the ather Academical Staffs of Faculty of Engineering .

And thanks to my friends who are Erkan HAKVERDİ and Selim İLERİ for their helps when I'm doing my project.

And finally I should greatfully thanks to the my family, first to the my Mother who is the

Gülli YILDIRIM, secondly to my father who is the Abdullah YILDIRIM and to the rest of the

My family's mambers.

THANKS TO THE EVERYBODY FOR THE EVERYTHING....

VEDAT

YILDIRIM

ABSTRACT

As you will see when write my program I used DELPHI 4.0 language. If you will ask why I chosed the programming and Delphi ? The reason is for programming; I wanted grow up my programming knowledge and experience and the another reason is when I looking for a job to the companies I can show them this programming when I said I know programming, that will be prove for me.

And let us come to the Delphi; I think I don't think so which I have to say to much things about Delphi. Because all of you know that the Delphi is the last programming language and it is the most esayest one. To prove that after a little time when I explain my program you will see that the flows of data, and connections between the menus, and researching on the databases how is being and what is the level of easy.

CONCLUSION

At the end of the this project if I should compare which is what I learned and what I gat by the this project I can say this;

- Firstly I learned this I have make a good organize to myself. Making good plannings and levels of bould on your project, and also you should good recognize your targets. And you should obey all of this planings.
- Secondly To make searching, when I'm working over a project, I should make some searching about the subject. And how can I communicate with the peoples who are pozition on the resources for my searching.
- And also I saw that I should have good communication with my adviser. Usually I have to visit my teacher to report what I did and are they okey or not.
- And the ather thing is that I know that I grow up my Programming knowledge and experience. I know that also now my responsibility is the continue to make new programmings to be better and better...
- And for the last one is the now I know the Delphi. It may not be profesionall but at least now I I had done my introduced the rest of that it will come by time. At least I know this, even this is also a good advantage for me.
