ACKNOWLEDGEMENT

First of all I would like to thanks Allah {God} for guiding me through my studies.

More over I want to pay special regards to my parents who are enduring these all expenses and supporting me in all events. I'm nothing without their prayers. They also encouraged me in crises. I shall never forget their sacrifices for my education so that I can enjoy my successful life as they are expecting. They may get peaceful life in Heaven.

*Also, I feel proud to pay my special regards to our project adviser (Assoc. Professor Dr Ilham Hüseyinov). He never disappointed me in any affair. He delivered me too much information and did his best of efforts to make me able to complete my project. Not to forget to give my thanks to the **NEAR EAST UNIVERSITY** education staff especially to **FACULTY OF ECONOMICS AND ADMINISTRATIVE SCIENCE (CIS)** doctors for their helping to take this degree and to achieve this level of education.(Assist. Professor Dr Yalçın Akçalı (Chairman - C.I.S.)), (Nadire ÇAVUŞ (Assistant to Chairman, CIS)) AND (Tansel Devin).*

I will never forget the days that I have been in Cyprus, from the University to the good friends that I have enjoyed my 4 years with them. I would like to thank them for there kindness in helping me to complete my project, ENG.Tala KHADER , ENG.Ala MANSOUR, ENG.Baha' KHALAF, ABU Sharkas, Mohammed MANSOUR and Adnan ABDULLMANNAN.

I would like also to thank my family again my father (Fawaz.O. AL-ENBAWI) my mother (Wafa.A.MUHSEN), my brother (Mohammed.F.AL-ENBAWI), my sisters (Lubna, Lyana, Rawan and Sara). Not to forget the big family in JORDAN AND ABUDHABI I would like to give them my regards and thanks for asking about me from my grand mother (3AYOSH) to the smallest child, and my uncles and there wife's (HARB&REEM, KHALIL&SAMAH, EMAD&SANA', RAMI&?) also KHALATE(HAIFA', SUHER AND BASMA).

Omar.F.AL-ENBAWI

ABSTRACT

This software is a specific program only suitable for electrical and electronics company which is used by the employees of the company it self.

This system is dived into seven processes in order for better user interface and friendly.

My solution to the problem I guess is quite understandable as I divided the system into main seven processes, such as employees, customers, sales, suppliers, products, payments and reports. Each of the section I designed is easy to understand and learn fast.

I hope this software will help the company to keep close eye on there business, account, sale, profit and what store products need.

INTRODUCTION

Toshiba is one of the most famous companies that deal in electrical and electronic equipments, and it's having a good rate in sailing around the world.

There for computers comes into work, in this project some languages will be used such as DELPHI in order to make the buttons, the navigation and the forms, some additions will be made over them in away that improve the program.

Access programming will be needed to design the data base by entering the information.

There are some processes in this project and these are:

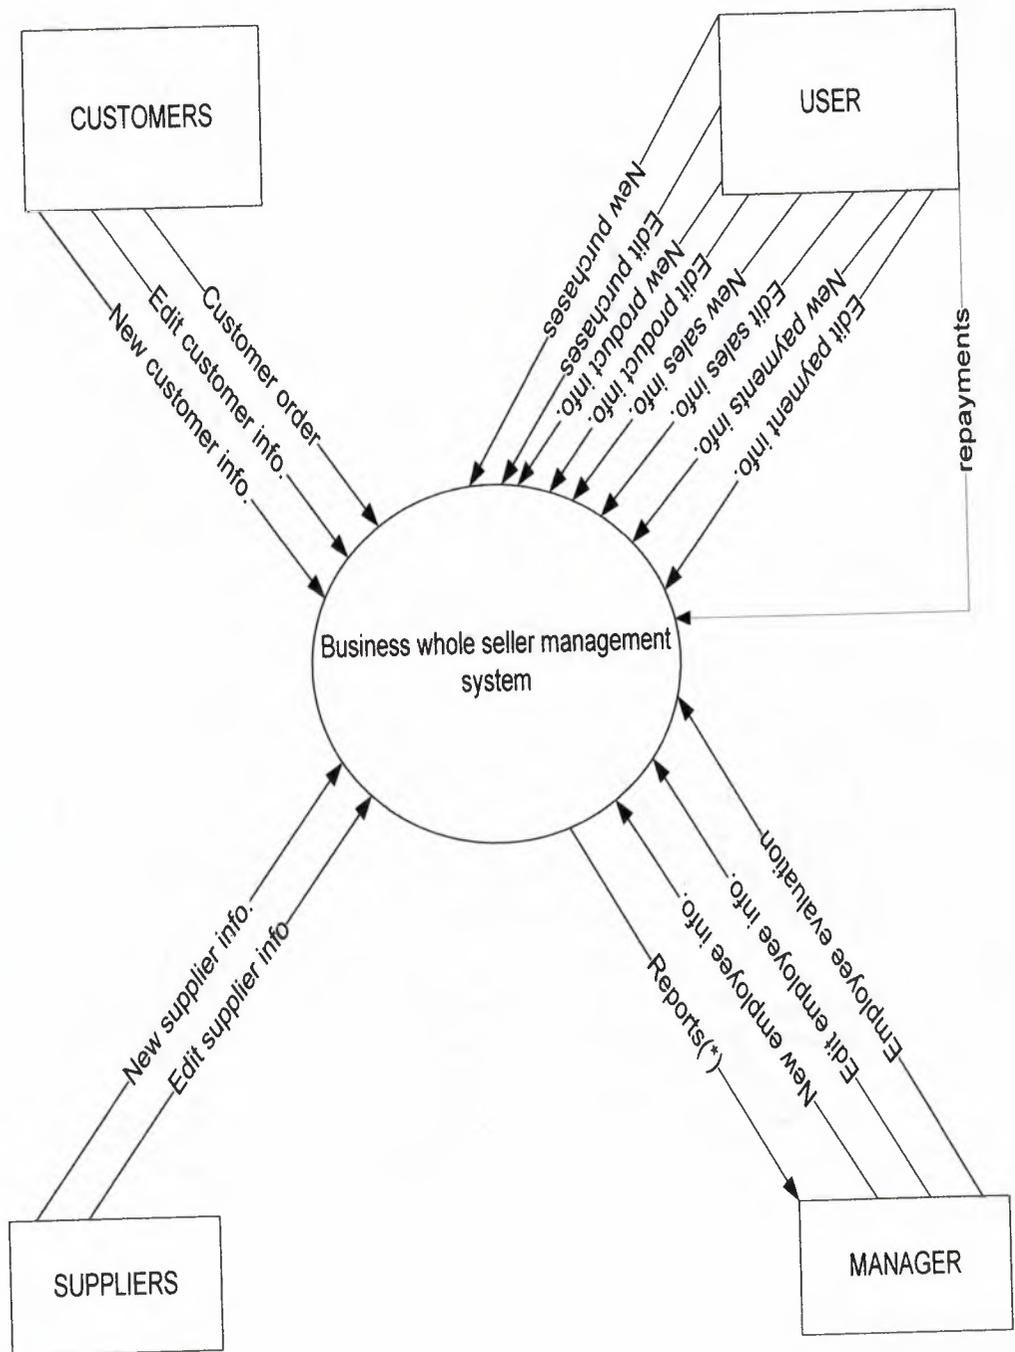

- Customer: information about the customers and the products that will be purchased.
- Suppliers: information about the suppliers.
- Employees: information about the employees.
- Sales: showing the company sales and the amount that had been sold.
- Payments: selling by cash and credits will be calculated.
- Products: information about the products, how many products are sold and how much the company have in the store.
- Reports: there will be sales, customers, suppliers, employees, payments, purchases and products reports.

1. DESIGN OF THE SYSTEM

1.1 Explanation

1. This company sells electronic equipments to individual customers.
2. The electronic products are bought from different suppliers.
3. The company will give an order to the suppliers in order to prepare it.
4. In selling process customers will give his order and according to that, the data is recorded by a company and tell the customers if there is a product or if there is in the store.
5. The payment can be done by cash or credits.
6. In credit process the installment and profits depends on the method.
7. For each supplier a file will be opened in the company.
8. The information of the employees and reports will be checked just by the general manager.
9. There are many kinds of reports in this company and these are;
 - Customer's reports.
 - Purchases reports.
 - Supplier's reports.
 - Employee's reports.
 - Sales reports.
 - Payment reports.
 - Reports.

2. USER MANUAL

2.1 USER GUIDELINES:

When the user opens the program, it will show him two kinds of buttons and these are;

1. Enter button.
2. Exit button.

When the user clicks on the enter button its will open another form, in this form in the left top side a bar will be founded. There you will find the main menu, quick start and about.

In the main menu you can find two sub menus (user and manger) in the user sub menu you can find another sub menu (sales) in it you will find sub menus where its (customers ,sales and payments). In the customer you can do in it the following operation (add, search and delete) in the sales menu you can do the sales operation for the customers and information of the sales). In the payment there are two sub menu payment and repayment. .in the payment menu the user will do the payment operation(cash and credit) ,if the customer pay full amount it will be account as cash but if the customer pays by credit so the user will go to the payment by credit button ,it will open another form where some information is needed in order to get the payment by cash such as (un limited installments ,payment information).In purchase sub menu products and suppliers will be founded. In the both of them you can do the operation such as (add, edit, delete and search).In manger sub menu employees and reports are founded in this sub menu just the manger can use it by a password which is (Omar).
