I. ACKNOWLEDGEMENT

I want to thank to:

First of all I want to thanks to my advisor Assist. Prof. Dr. Nadire Çavuş and then my instructors Assist. Prof. Dr. Yalçın AKÇALI and Mr. Atalay TALAYKURT for their support in completion of my project.

My colleague İbrahim TEKSAMANCI, Mustafa ERÜLGEN, Mustafa GÜÇLÜ for their technical and psychological contributors and suport to conclude the project.

Also thanks to:

My family for providing me while preparing the project for their psychological support in all parts of life by providing me comfort and the necessary conditions to develop myself and educate in high level.

II. ABSTRACT

The Public Information Office is the office that gives all govermental news to the related offices around the Government and whole world. This office hasn't got a computer based information systems.

All govermental writen documents which are coming to and going from this office are not hidden in any computer based files. Nearly fifty documents coming and twenty documents going out. This office in every day this project will be help. To hold and scan all documents in computer based system and to look at then realated dates, related subjects.

Especially photos, wich the treasures in history of Cyprus are all in film based storage nearly 15,000 photos wich the oldest are will be sored in the computer based system with the usage of and this project the system will give advantage to look at these photos related dates and related subjects.

There are 30 officers in this office and keepepd separate files for each of them files and hold documents are papre based and easly deformed. With this project the special personal files will be made computer based system and all related documents will be scan in this system they will be check in any time with any subject by the help of my project.

III. INTRODUCTION

The Public Information Office Information System (EDEKS) is a electronically storaged system. The project will be done for the needs of Prime Ministry Public Information Office.

There is no system, there will be no recoverment so a new project will be done.

The Target of the Project :

*All written documents and exchange of letters between Goverenmental Offices are filed as Paper Base.

*In the above mentioned Office there are documents and photos on Cyprus issue about 14,000-15,000 start from year 1957.

*There are 30 officers in the Office and Personal Files of the officers are all filed as paper base.

Target: Our target to do this project is to facilitate a computer based information system to ease the finding and to avoid the deformation of the documents.

System has 4 main process.

'PUBLIC INFORMATION OFFICE' INFORMATION SYSTEMS

- 1- Document Registration Process (EVRAK KAYIT İŞLEM)**
- 2- Personell Matters Process (PERSONEL KAYIT İŞLEMİ)**
- 3- Filing Process (DÖKÜMANTASYON İŞLEMİ)**
- 4- Report Process (RAPOR İŞLEMİ)**

III.I PROCESS

PROCESS 1.

DOCUMENT REGISTRATION PROCESS

Sub Process 1

Document to Receive. (Gelen Evrak Kaydı)

Document Registration.

Document Delete.

Document Update.

This process storages the input datas and give change to reach quickly when they are necessary for users since they are electronic these datas stay forever.

Sub Process 2

Document to Sent. (Giden Evrak Kaydı)

Document Registration.

Document Delete.

Document Update.

This process storages the input datas and give change to reach quickly when they are necessary for users since they are electronic these datas stay forever.

PROCESS 2

PERSONAL MATTERS PROCESS

Personal Matters Process. (Personel Kayıt)

Personal Registration.

Personal Delete.

Personal Update.

This process storages the personel datas and give change to reach quickly when they are necessary for users since they are electronic these datas stay forever.

PROCESS 3

FILING PROCESS (System has 5 sub process.)

Sub Process 1

Photo Archive (nearly 14750 icon, 388 file)

Photo Registration.

Photo Delete.

Photo Update

This process stored the photos.

Sub Process 2

Local Newspapers Pages.

Newspaper Registration.

Newspaper Delete.

Newspaper Update

This process stored the newspapers.

Sub Process 3

Searching Files.

Files Registration.

Files Delete.

Files Update

This process stored the searching files.

Sub Process 4

Translation Documents.

Documents Registration.

Documents Delete.

Documents Update

This process stored the files.

Sub Process 5

General Reports.

Reports Registration.

Reports Delete.

Reports Update

This process stored the files.

Sub Process 6

Daily News Services. (Turkish,English)

Daily News Registration.

Daily News Delete.

Daily News Update

This process stored the files.

Those sub processes are storages the input datas and give change to reach quickly when they are necessary for users since they are electronic these datas stay forever.

PROCESS 4.

REPORT PROCESS

Report of Sent Document.

Report of Recive Document.

Report of Personel List.

Report of Photo Archive.

Report of Newspaper Archive.

Report of Searching Files.

Report of Translation Documents.

Report of Activity for PIO.

Report of Daily News Services

IV. DESIGN OF THE SYSTEM

IV.I EXPLANATION

Minimum Properties or higer

Intel Pentium IV processor 1000 MHz

1 GB of RAM

500GB harddisk

DW-ROM

Fast Ethernet Adapter

A4 Scaner and colour printer

Ups

1 TB external Hard Disc (Backup unit)

I used Delphi programming language for writing this program and MS Access database that has connection with Delphi programming.

Also, to be able to run this program, Delphi has package and Deployment Wizard that encodes the program and gives the execution of the program to the user.

IV.I.I. PROJECT IDENTIFICATION AND SELECTION

PROJECT NAME :

“ PUBLIC INFORMATION OFFICES ELECTRONIC STORAGE SYSTEM ”

The Public Information Office Electronic Storage Syastem aims to serve the personel who works in this office forms inspection in the best way.

The existing System was paper based and not standable for a long years. Because of deformation of the papers and films most of the documents are lost before.

With this system the documents will stay for a long time and will be used several times.

Personal will use this progra in each related departments epecially the document storage department Photo Department and director secretary will use this program each personal in this departments has enought kowladges to use the computer and has enough capabilities to use this program. With a one week course they will use this program easly and correctly. So one of the secret parts in this program will be respected by e password ot interapt the users while entering this parts. This program will be used only by the Public Information Office and documents are all related with this office.

IV.I.II PROJECT INITIATION AND PLANNING

This system should have a network and related hardwares that are mentioned below:

- Computers for all personnel,
- A computer and printer for document storage department,
- A computer for office director.

Beside these hardwares, some hardwares and softwares for the new network system that will be applied should be afforded as well.

The department director will decide among the personal which part of the program by whom will be used and will give a permission to these password to enter the system.

IV.I.III ANALYSES

INFORMATION SYSTEMS TECHNICAL FEASIBILITY REPORT

Document registration, filing and personal matter, are saving under protection by assisting of essential either appliance or equipments at computer medium in secure and systematical way.

Analyses Operation of The Project :

Unit : Sent Document Registration

To drive a Program: Delphi – Access DB

Properties of Program;

- Enable to organize, to save and to research
- Enable to stock all of the documents
- Enable to open the new files
- Enable to arrive easy to document and report
- Enable to print of reports

Unit : Recive Document Registration

To drive a Program: Delphi – Access DB

Properties of Program;

- Enable to organize, to save and to research
- Enable to stock all of the documents
- Enable to open the new files
- Enable to arrive easy to document and report
- Enable to print of reports

Unit : Filing

To drive a Program: Delphi – Access DB

Properties of Program;

- Enable to research files
- Enable to arrive easy to notes about the information of exterior obligation
- Enable to find the e-mail list
- Easy to see allocate news
- Easy to print the reports of the department activities
- Easy to arrive archives of the translation files and easy to print
- Enable to receive daily news of the bulletin which is coming from the department and enable them to print

Unit : Personal Matters

To drive a Program: Delphi – Access DB

Properties of Program;

- To find all of the information for workers
- Enable to follow up the permission forms of personal workers
