

## **Biography of Assoc. Prof. Dr. Kabir Sadeghi**

Kabir Sadeghi received the PhD degree in Civil (Structural) Engineering and the DEA degree in Civil (Structural) Engineering from the University of Nantes/France, in March 1995 and May 1991, respectively. He has also an MSc degree in Structural Engineering and a BSc degree in Civil Engineering from Amirkabir University of Technology (1986 and 1979, respectively). He has been ranked as top student during his PhD, DEA, MSc and BSc studies. He has submitted four new formulas for numerical simulation and damage evaluation of structural elements. He has had a great deal of experiences and collaboration in marine, offshore and industrial structures in international big projects as project manager, project engineering manager, senior consultant, designer and supervisor. Over 30 articles have been published from his works in peer reviewed SCI Journals, International Journals and International conferences. Two technical books also have been published by him, which are mainly references for marine and offshore structural engineers, Master students and PhD candidates. He is the founder of IR Marine and Offshore Structures Code of Practice, the founder of The International Conferences on Coasts, Ports and Marine Structures (ICOPMAS) and the chairman of the International Scientific Committee of ICOPMAS90, ICOPMAS96, ICOPMAS98 and ICOPMAS2004. Since 1986 he has taught/researched as part time or full time professor in several universities such as; Sharif University of Technology, Amirkabir University of Technology, Iran Science and Technology University, KNT University of Technology, Shahid Beheshti University and Girne American University. In September 2015 he joined The Near East University, Engineering Faculty.
