

## **Dr. Süleyman Aşır**

He was born on September 3, 1980 in Famagusta, Cyprus. After completing his secondary education in Gazimagusa Turkish Maarif College he received his Bachelor of Science degree in Chemistry from Hacettepe University. Later on, he obtained his MSc. in Biochemistry from Hacettepe University Chemistry Department and Ph.D in Organic Chemistry from Eastern Mediterranean University Chemistry Department. Supported by the grant from European Commission for the academic year 2010–2011 he worked in University of Modena and Reggio Emilia in Italy as a post-doctoral researcher. Between the years 2013 and 2015 he worked in Middle East Technical University Northern Cyprus Campus Chemistry Program as the laboratory coordinator.

His main research interests include organic synthesis, photochemistry, functional dyes, dye sensitized solar cells, biopolymers, molecularly imprinted polymers and affinity chromatography.
