The Guide to Plant Identification

Student :

Name and Surname :

Student Number :

2015

CONTENT TABLE

Practice Program.....	1
General Lab Rules and Guidelines.....	2
Introduction - Structure of a plant.....	3
Leaves	7
The parts of leaf.....	8
Simple leaves	
Shapes of Lamina).....	11
Venation (vascularity of the)	14
Compound leaves	17
Shapes of Lamina - summary.....	20
Margins of leaves.....	21
Apex of leaves.....	24
Base of leaves.....	25
Surface feature of leaves.....	27
Arrangement.....	31
Functions and usage.....	32
Flowers	33
Structure of a flower.....	33
Imperfect-Incomplete flower	36
perfect-complete flower	37
Calyx (sepal).....	39
Corolla (petal).....	41
Floral symmetry.....	44
Androecium (stamen).....	45
Polen	47
Gynoecium (pistil).....	48
Placentation types.....	50
Insertion.....	52
Inflorescence	54
Floral Formula and Diagram	64
Functions and usage.....	68
Fruits (Fructus).....	69
Types of Fruit.....	71
Dry indehiscent fruits	73
Caryopsis,nuts, achene, ssamara,schizocarp.....	75
Dry dehiscent fruits	75
Follicle,legume,capsule,siliqua,silique	
Fleshy fruits	77
Simple berries,drupe,hesperidium,pepo	
Compound (Multiple)Fruits;Aggregate fruits.....	79
Accesory fruits.....	81
Usage.....	83
Seeds (Semen).....	84
Roots (Radix).....	85
Functions and usage.....	
Stems	90
Specialized stems and Microscopical properties.....	94
Barks and Microscopical properties	99
Report form	103
